

United Inches Chart

To estimate the footage required for chops and joined frames add the length and width together. Take the total and match it to the width of the profile. For example - 12" x 36" = 48". If using a 2" wide moulding you would need 9.7 feet.

UNITED INCHES	MOULDING WIDTH IN INCHES							
	1/2	1	1 1/2	2	2 1/2	3	4	5
